Archive of Published SOA Exam Problems

The SOA posts copies of [past SOA exams](#) from roughly past five years. Until 2023, the SOA also provided past exams going back decades, but now those older exams are available only by request from the SOA.

We've tried to make your life a little easier by organizing all of these old exams into bundles in this section of the course. Each zip file contains past exams and the SOA model solution file for various historical exams that still contain relevant exam problems:

- 8I Exams (early 2000s)
- ILA-DP-U Exams (2007–2013)
- APM Exams — APM was an exam on the old Investments (pre-QFI)
- ILA-LFV-U Exams (2013–2019)
- ILA-LP Exams (2013–2019)
- CSP-U Exams (2007–2013)
- QFI Exams — Includes QFI Core and QFI Advanced, which predate the current QFI Quant and QFI PM exams
- ILA-LPM Exams (2019–present)

For LPM exams given in 2020 and later, we recommend using the versions posted in the Supplementary and Review Material section of the course. We've converted those more recent exams to a CBT Word/Excel format for you there.

Please note that MANY questions on these pre-2020 exams are NOT on the current syllabus.

Please use our **Analysis of Past Exams spreadsheet** posted in the Supplementary and Review Material section of the course to locate problems are that still on syllabus. That spreadsheet organizes past questions right down to the sub-question level and maps them to current syllabus sources as well as our course lessons. You'll find more instructions and tips when you download that spreadsheet, including more backstory on the historical SOA exams listed above.

The remainder of the SOA Exams tab of the course also contains many TIA solutions to past SOA questions. Our solutions contain additional teaching points and also help avoid confusion from mistakes in SOA model solutions.

Solutions to exams given in 2020 and later are posted in the Supplementary and Review Material section of the main Lessons branch of the course.
